ABSTRACTED-PUB-NO: KR2001026970A

BASIC-ABSTRACT:

NOVELTY - An MP3 player inserted into a PCM-CIA(Personal Computer Memory Card International Association) card of a PC is provided to directly insert an MP3 player body into a slot of the PCM-CIA card, and to build a connector in a front of the MP3 player body, to download data of the PC to a memory of the MP3 player.

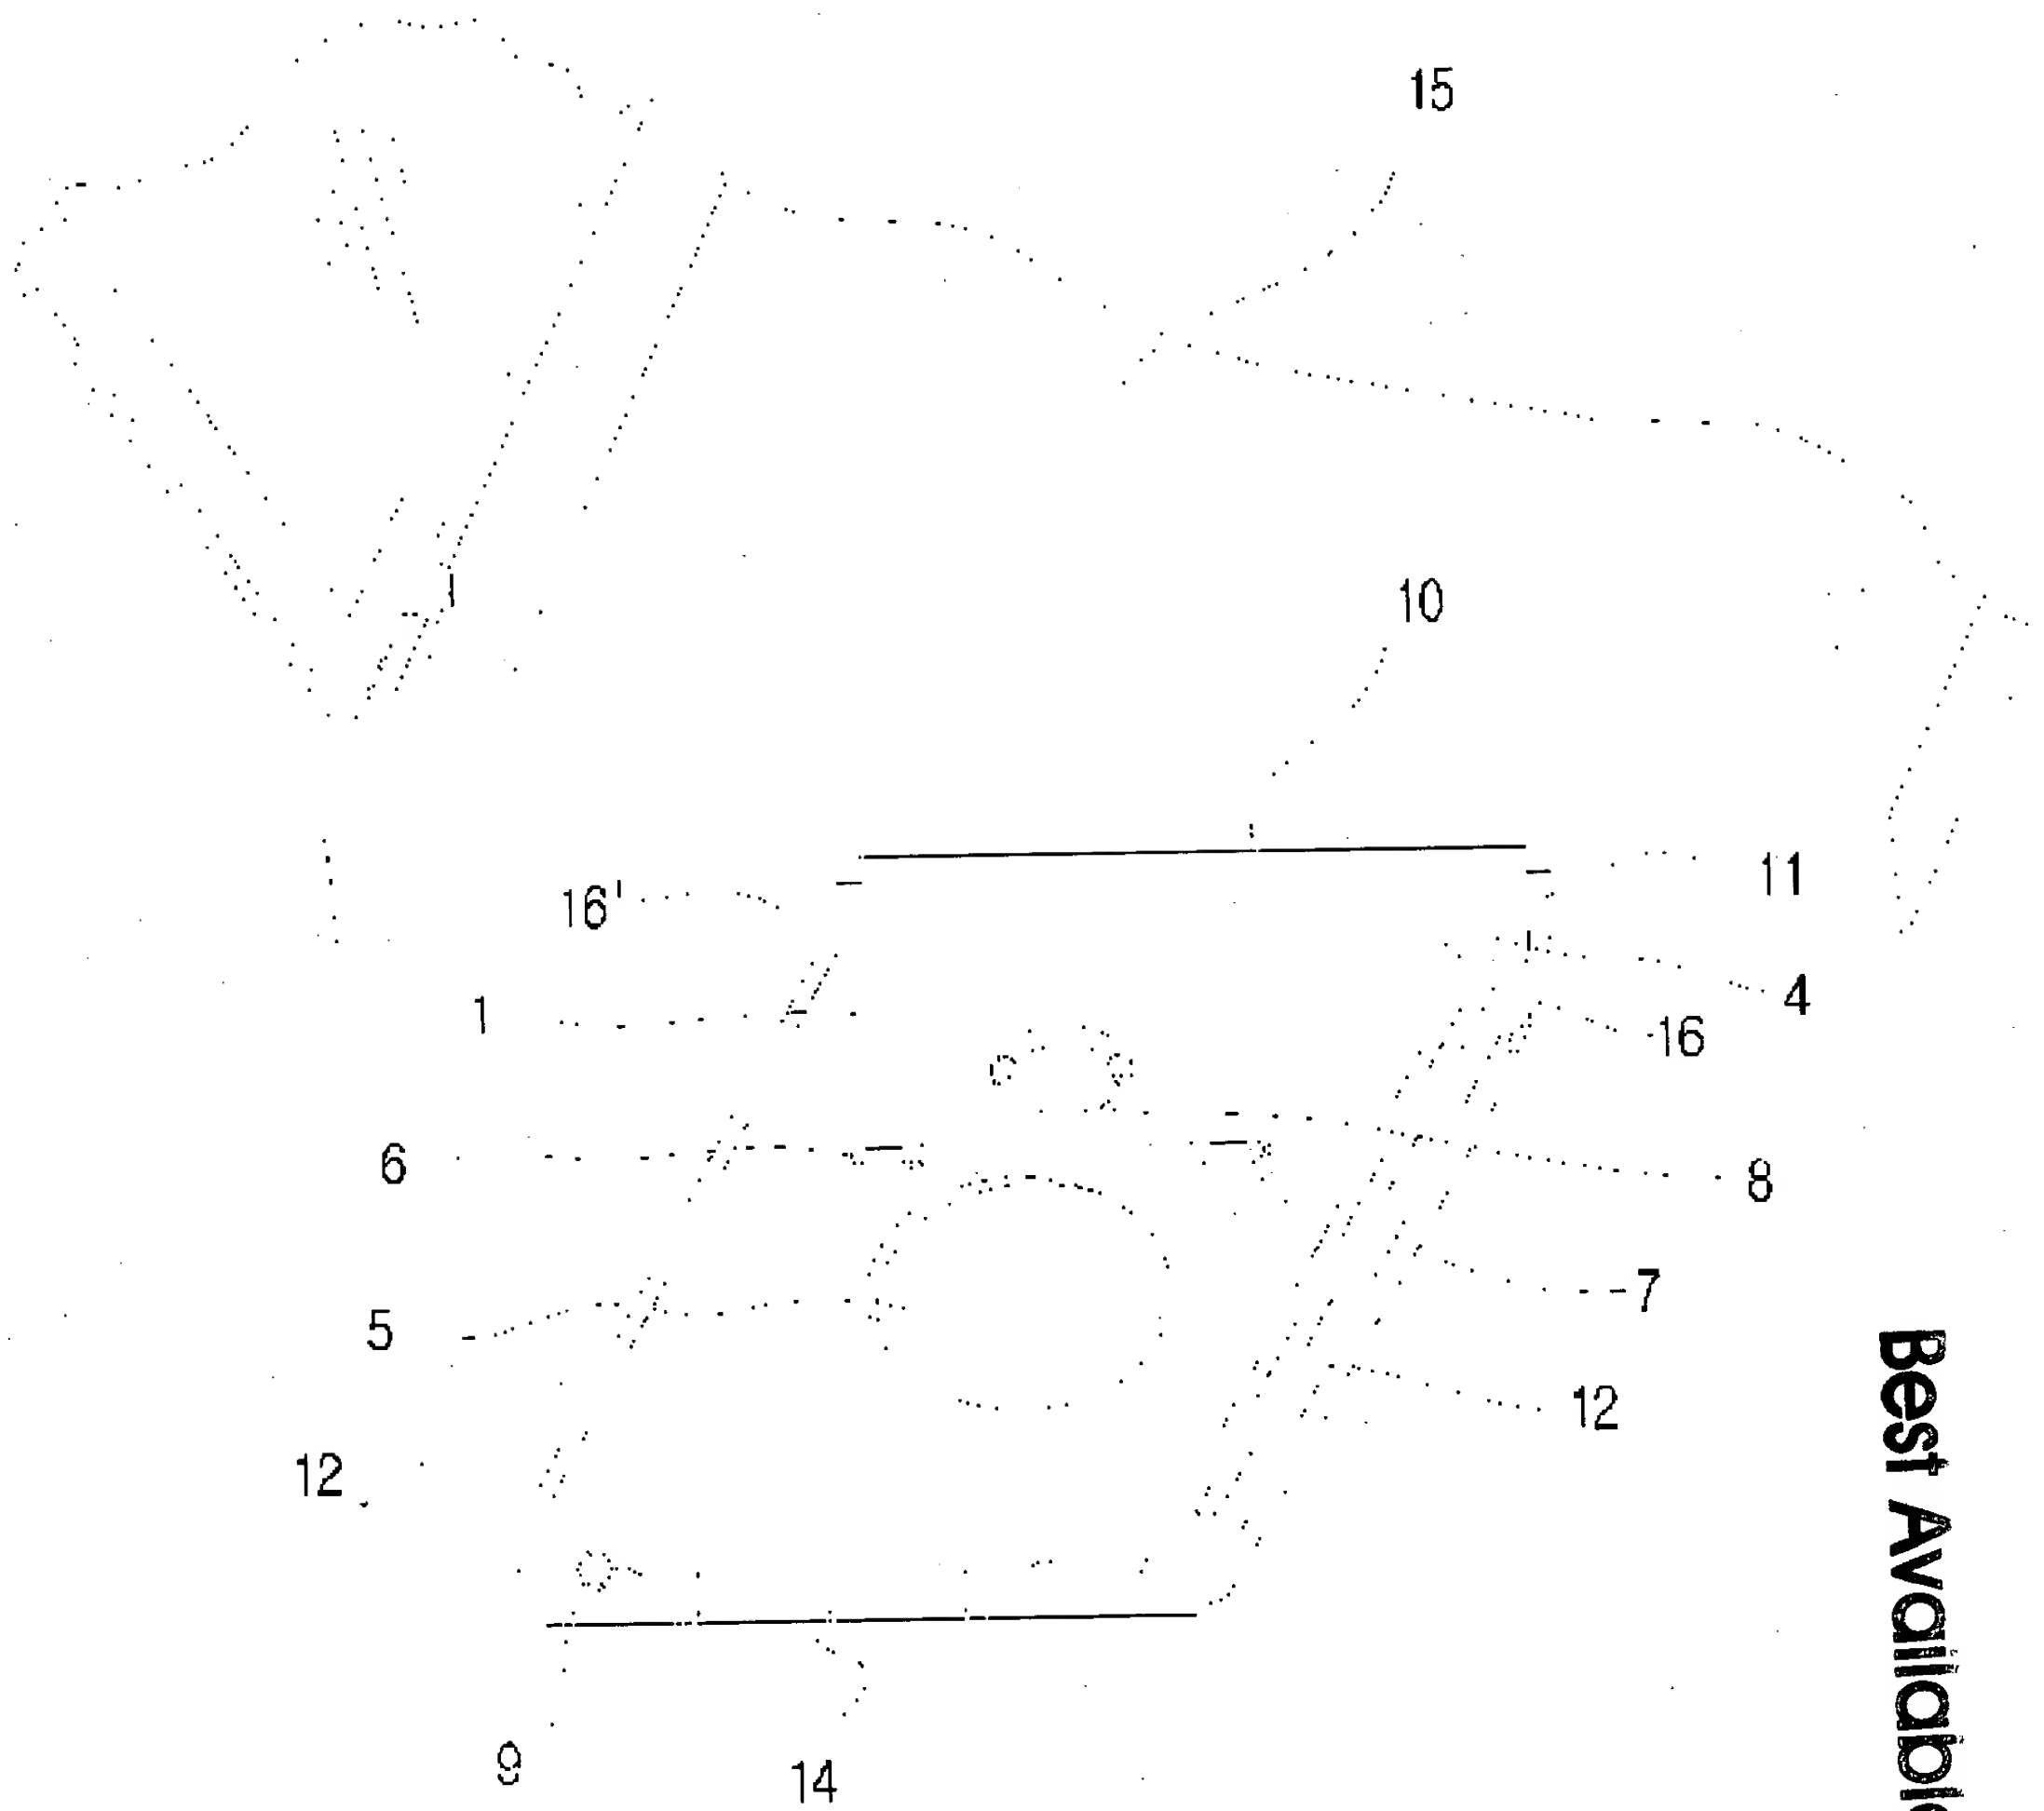

DETAILED DESCRIPTION - When a front mounted with a connector(4) is inserted.

into a PCM-CIA(Personal Computer Memory Card International Association) card slot(10) of an information processor(15) in an MP3 player body, player inserters(12) are connected with a connector of the PCM-CIA card slot(10), along a guide groove(11) installed inside of the PCM-CIA card slot(10). The player inserters(12) download music files on the Internet through the information processor(15), and store the downloaded music files through an interface and a data storage including a memory of an MP3 player(1). When the stored music files are played, the MP3 player(1) is detached from the information processor(15). The stored files displayed on a display(5) are selected by a display selection key(8). A user is capable of listening to the stored files through a data player/controller by operating a functional key(7).
